

HIMANSHU GARG

CS Engineering Student

+91 8800425495 | himanshu0004garg@gmail.com | <https://github.com/Himanshu04-stack>

PROFILE

Detail-oriented Computer Science Engineering student with a strong foundation in Data Structures and Algorithms (DSA) and software engineering. Proficient in Java, full-stack development, and system design, with hands-on experience in building scalable applications and participating in competitive hackathons. Adept at analytical problem-solving and translating complex requirements into robust, high-quality technical solutions.

EDUCATION

SRM University, Sonepat, Haryana

Expected Graduation: 2027

Bachelor of Technology, Computer Science Engineering

- Current CGPA: **7.85**(till 6th semester)

Govt. Sarvodaya Vidyalaya Sector-6 Rohini, New Delhi

2023

Higher Secondary (12th CBSE)

- Percentage: **76%**

SKILLS & COMPETENCIES

- **Analytics & Data:** SQL, Advanced Excel, Data Visualization, KNIME, DBMS
- **Programming Languages:** Java, Python, Kotlin, Node.js, C
- **Core Competencies:** Data Structures & Algorithms (DSA), Full-Stack Web & Mobile Development, Object-Oriented Programming (OOP), Analytical Problem Solving, Software Architecture
- **Frameworks & Tools:** Firebase, Git, Spring Boot, OSMDroid

KEY PROJECTS

SafeTour AI – Tourist Safety Application

- Developed a comprehensive Android application using Java, integrating OSMDroid for mapping and Firebase for backend services to enhance tourist safety.
- Implemented real-time navigation, SOS protocols, and AI-based anomaly detection to provide immediate assistance and proactive risk monitoring.
- Designed a modern UI featuring a dynamic safety gauge, ensuring secure data management and an intuitive user experience.

Machine Learning Image Classifier

- Built an end-to-end predictive pipeline using KNIME, encompassing data cleaning, processing, and visual evaluation for accurate image classification.
- Implemented a Decision Tree Learner, Predictor, and Scorer node to train the machine learning model and evaluate performance metrics.
- Conducted rigorous model evaluation utilizing confusion matrices and decision tree logic maps to ensure precise classification.

Battery Notifier

- Developed a system-monitoring utility utilizing Java and macOS scripting to extract and analyze core hardware data.
- Implemented logic to monitor real-time power events and track high cycle counts on M1 architecture.

WORK EXPERIENCE

College Ambassador | Techfest, IIT Bombay

December 2025 – March 2026

- Spearheaded campus outreach initiatives, utilizing strong interpersonal communication to boost event participation.
- Managed promotional tasks and organized student engagement strategies under tight deadlines.

CERTIFICATIONS

Advanced Software Engineering Simulation – Forage

Front End Web Development Foundation – freeCodeCamp

Python Essentials 1 – Cisco Networking Academy

Solutions Architecture Simulation – Forage

Java Intermediate – SoloLearn
